DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear in what way the cheek plate is "parallel" to the mounting module, since no features of the elements are specified that are linear and, thus, able to be parallel. In claim 2, the phrase "may slide" is vague and indefinite. "May" leaves unclear the limitations being claimed. Also, the remainder of the disclosure apparently fails to show the stock module sliding so it is unclear how the apparatus slides. In claims 4, 6, and 7, it is not clear what function the "receiving interface" performs or how it is structurally related to the other claimed elements.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. Claims 1, 2, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hammond, Jr. (5,173,564) in view of McCarthy (6,481,143).

Hammond, Jr. discloses a modular stock system for a rifle comprising substantially all claimed elements, including a mounting module (74) attached to the receiver (58), and a replaceable stock module (60, 110) attachable to the mounting module, where the stock can be selected from various stocks modules. Hammond, Jr. fails to show a cheek plate

parallel to the mounting module. McCarthy teaches a gun system that can have different stocks and each has a plate attached to the upper side of the stock. See the attached element in Figure 1 and 10. Without further claimed structural limitations, this plate anticipates a "cheek plate". Motivation to combine is the clear advantage of having a conveniently placed element to put the cheek against, since this will improve gun stability and aim. To employ the teaching of McCarthy on the stock system of Hammond, Jr. and have a cheek plate is considered to have been obvious to one having ordinary skill in the art.

5. Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
